Software

2017: PasStat Scoreboard 2017. Collaboration with Alberto Corona of Transient Software in Spain. [PasStat Scoreboard 2017](#) is Online Software and is used to collect sport and movement data of many types. Saves data to local storage on web browser, and can be ported to pdf by each observer. PasStat Scoreboard 2017 is published on the distributed web via DAT and the BeakerBrowser.

2016: PasStat 2016. Working with James Moore, ELM Programming Enthusiast, [PasStat 16](#) is an update of PasStat 2015. In PasStat 16, users can download the state of the app (save data) on the local computer, tablet, or smartphone. This data can be reloaded later or shared with other users.

2016: Mark Mann's Shared Games. [Shared Game Software](#) was created by M.D. Mann for the purpose of sharing sport/game simulations, and task collaboration. The back end code for the published simulations for downhill ski racing game, tactical task coordination (snake/asteroids game), and table tennis (pong) are part of the summit.hashbase.io website and are available via the DAT protocol to fork, modify, and redistribute.

2015: Rotation Stats. [Rotation Stats](#) is a rework of PasStat, and is designed (setup) to help volleyball coaches in game situations know how each rotation is performing in Serve (Scoring Opportunities), and in Serve Receive. The App works best on a computer, but, can also be used on a tablet or smartphone.

2015: Retro Pong. Elm [Pong](#) is used as a tool to teach programming for data collection. For Coaching Students and athletes it can be used to teach tactical skill development. Programmatic modifications of ball speed, player movement, racket size, and other factors make the use of elm-pong

a good online tactical skills learning exercise.

2015: PasStat (Local Version). Solves the problem of using PasStat in Gyms when the internet is not accessible. After preloading the app, Coaches can go into the gym to record and save passing data using a fully functional web browser based app in offline mode. The Free WebApp is available at: <http://www.wellnessoft.org/pass15/> After being downloaded for the first time, the PasStat App works in offline and airplane mode. Authored by: M.D. Mann.
